23 Years of experience

Professional Bio:

Dr. Ahmad Kablan is a global leader in nutrition, food systems, and sustainable development with over 23 years of experience designing, implementing, and scaling multi-sectoral programs that bridge research with real-world impact. His expertise spans food systems transformation, food loss and waste, nutrition, and food safety, with a strong focus on integrating evidence-based solutions across agriculture, health, education, and private sector initiatives.

Dr. Kablan brings a unique blend of experience from academia, government, and international development. He conducted advanced research at the National Institutes of Health (NIH), where he focused on nutrition science, metabolic health, and the prevention of diet-related

Skills & Expertise:

Project Management, Budget & Finance, Grants Management, Strategic Planning, Policy Development, Stakeholder Engagement, Capacity Strengthening, Agriculture & Food Security, Global Health, Food safety, Food Loss & Waste

Sectors of Work:

Diplomacy & Foreign Affairs, International Development, Public Health, Economic Growth, Technology & Innovation

Languages Spoken:

English, Arabic, Italian, Spanish

chronic diseases. His research at NIH and other academic institutions contributed to a deeper understanding of the links between food, health, and policy, helping shape public health and nutrition strategies globally.

In addition to his research credentials, Dr. Kablan is an experienced educator. He served as a faculty member at the University of Jordan, where he taught biotechnology and public health, mentored graduate students, and contributed to curriculum development aimed at addressing national and regional challenges in food security and health. His commitment to building local and regional capacity continues to be a cornerstone of his work.

Over the course of his career, Dr. Kablan has cultivated a strong international network across governments, academia, the private sector, and philanthropic and non-governmental organizations. He is recognized for his ability to foster strategic partnerships and lead collaborative initiatives that drive transformative, cross-sectoral change.

Dr. Kablan is the founder of WICE Consulting, through which he offers strategic advisory services to strengthen food systems, enhance nutrition outcomes, improve food safety, build institutional and human capacities, and promote sustainable practices. WICE provides tailored, evidence-based solutions that support national and global efforts to achieve the Sustainable Development Goals (SDGs).

Fluent in both research and policy environments, Dr. Kablan is a sought-after advisor and public speaker, known for translating complex scientific insights into practical, scalable solutions. His work is grounded in a deep commitment to equity, sustainability, and innovation in food systems.
